

NEW DAY

Specialized Services Annex

Occupational Health & Safety
Civil Protection & Emergency
Environmental Services & Waste Management
Compliance & Legal Services

A specialized annex to the main corporate profile, presenting the scope of services, operational capabilities, and actual teams without repeating the general corporate content.

Specialized Services

Independent when needed,integrated when connected to a project

New Day provides specialized services that can be integrated within turnkey projects or delivered independently to facilities, companies, and organizations. These services are delivered through multidisciplinary teams, clear scopes of work, and measurable responsibilities.

Occupational Health & Safety

Building and managing safety systems, risk assessment, inspection, training, permits, incident investigation, and documentation.

Civil Protection & Emergency

Emergency and evacuation plans, fire-risk review, readiness checks, emergency-team training, drills, and incident analysis.

Environmental Services & Waste Management

Environmental aspects, monitoring, waste classification, temporary storage, authorized transport coordination, records, and reports.

Compliance & Legal Services

Contracts, obligations, permits, regulatory follow-up, claims, and legal risk mitigation related to projects and operations.

OCCUPATIONAL HEALTH & SAFETY

Managing safety systems and operational compliance

This service covers the development, management, and review of occupational health and safety systems, transforming safety requirements into measurable field practices.

SYSTEM

Prepare and update occupational health and safety policies and systems.
Deliver training, awareness sessions, and daily toolbox talks.

RISKS

Assess workplace risks and define control and follow-up measures.
Investigate incidents, injuries, failures, and operational deviations.
Follow up on medical checks and occupational health requirements.

CONTROL

Conduct audits, inspections, and non-conformity reporting.
Manage work permits and monitor high-risk activities.
Manage contractor and maintenance-company safety requirements.
Monitor personal protective equipment and measuring devices.

DOCUMENTATION

Maintain registers, periodic reports, and safety statistics.

Civil Protection & Emergency

Prevention, preparedness, and response

ENVIRONMENTAL MANAGEMENT

From monitoring to safe handover and disposal

New Day supports facilities in organizing environmental aspects and the waste-management cycle, from identification, classification, segregation, and temporary storage to handover to licensed service providers, with records, requirements, and field procedures properly followed up.

ENVIRONMENTAL MANAGEMENT

- Identify environmental aspects and impacts.
- Conduct environmental monitoring and measurements.
- Prepare pollution prevention and control plans.

CHEMICALS & HAZARDOUS MATERIALS

- Manage chemicals and safety data sheets.
- Respond to spills and leaks.

WASTE MANAGEMENT

- Identify and classify hazardous and non-hazardous waste.
- Organize collection points and temporary storage areas.

TRANSPORT & DISPOSAL

- Follow up transport and handover to licensed service providers.

DOCUMENTATION & FOLLOW-UP

- Prepare waste quantities, records, and reports.

Important Execution Note

Activities requiring specific licenses are implemented in cooperation with contracted licensed companies. New Day teams provide the technical, supervisory, or field role according to each project scope.

Compliance & Legal Services

Legal support linked to projects and operations

The legal and compliance function supports projects and operations through contract review, obligations management, permits, regulatory requirements, and risk reduction related to contractors, suppliers, variations, and claims.

CONTRACTS

- Draft and review contracts and agreements.
- Support contractor, supplier, and service-provider contracts.

PERMITS

- Follow up laws, regulations, permits, and official requirements.

CLAIMS

- Draft and review contracts and agreements.
- Support contra- Manage obligations, variations, and claims.

COMPLIANCE

- Develop internal policies and procedures.
- Organize statutory records and documentation.
- Support environmental and occupational compliance.

control, and spill response.

Field Support & Emergency Response Team

Specialized expertise supporting every project

Saad Morsi Mohamed Morsi
Environmental Specialist & Emergency Support

Environmental monitoring and support for emergency procedures at project sites.

Mahmoud Hatem Gaber
Civil Engineer & Site Monitoring Specialist

Field inspections, monitoring of high-risk activities, and documentation of site observations.

Ahmed Esmat Mohamed
Safety & Emergency Response Specialist

Emergency planning, evacuation drills, training, and response-readiness inspections.

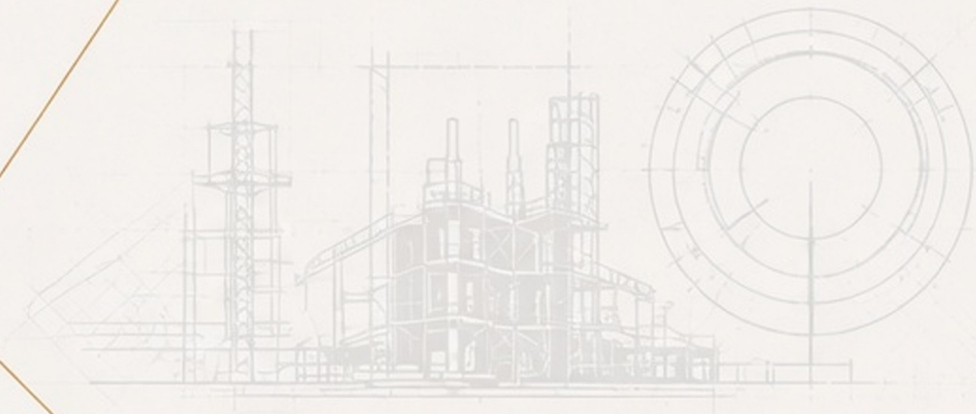

Mahmoud El-Sayed Ismail
Hazardous Materials Response Specialist

Chemical-incident management, spill response, isolation procedures, and hazardous-material control.

Service Delivery Models

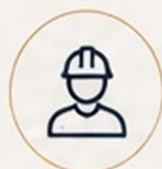

Flexible solutions for different operational needs

New Day delivers specialized services through flexible engagement models tailored to each organization's operational requirements, project scope, and risk level.

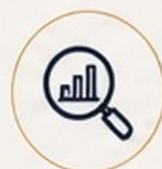

Full Management

Complete management of occupational health, safety, and environmental functions within the facility.

Review & Assessment

Evaluation of existing systems, gap analysis, risk reviews, and compliance checks.

Training & Emergency Drills

Awareness programs, team training, evacuation drills, and emergency-response exercises.

Legal & Compliance Support

Legal, contractual, and regulatory support connected to projects and operations.

Resident or Periodic Supervision

Resident specialists or scheduled supervisory visits according to operational needs.

System Setup

Development of policies, plans, registers, procedures, and reporting systems from the outset.

Waste Management Support

Waste-management coordination through licensed partners, with technical or supervisory follow-up by New Day.

Project-Based Services

Defined scope, deliverables, timeline, KPIs, responsibilities, and reporting before mobilization.

Contact & Next Step

A practical starting point for every specialized engagement

New Day starts each specialized engagement by understanding the facility, reviewing the operational context, defining the service scope, and agreeing on deliverables, responsibilities, and performance indicators before work begins.
